VECTOR
AUDIT & SECURITY CONSULTING

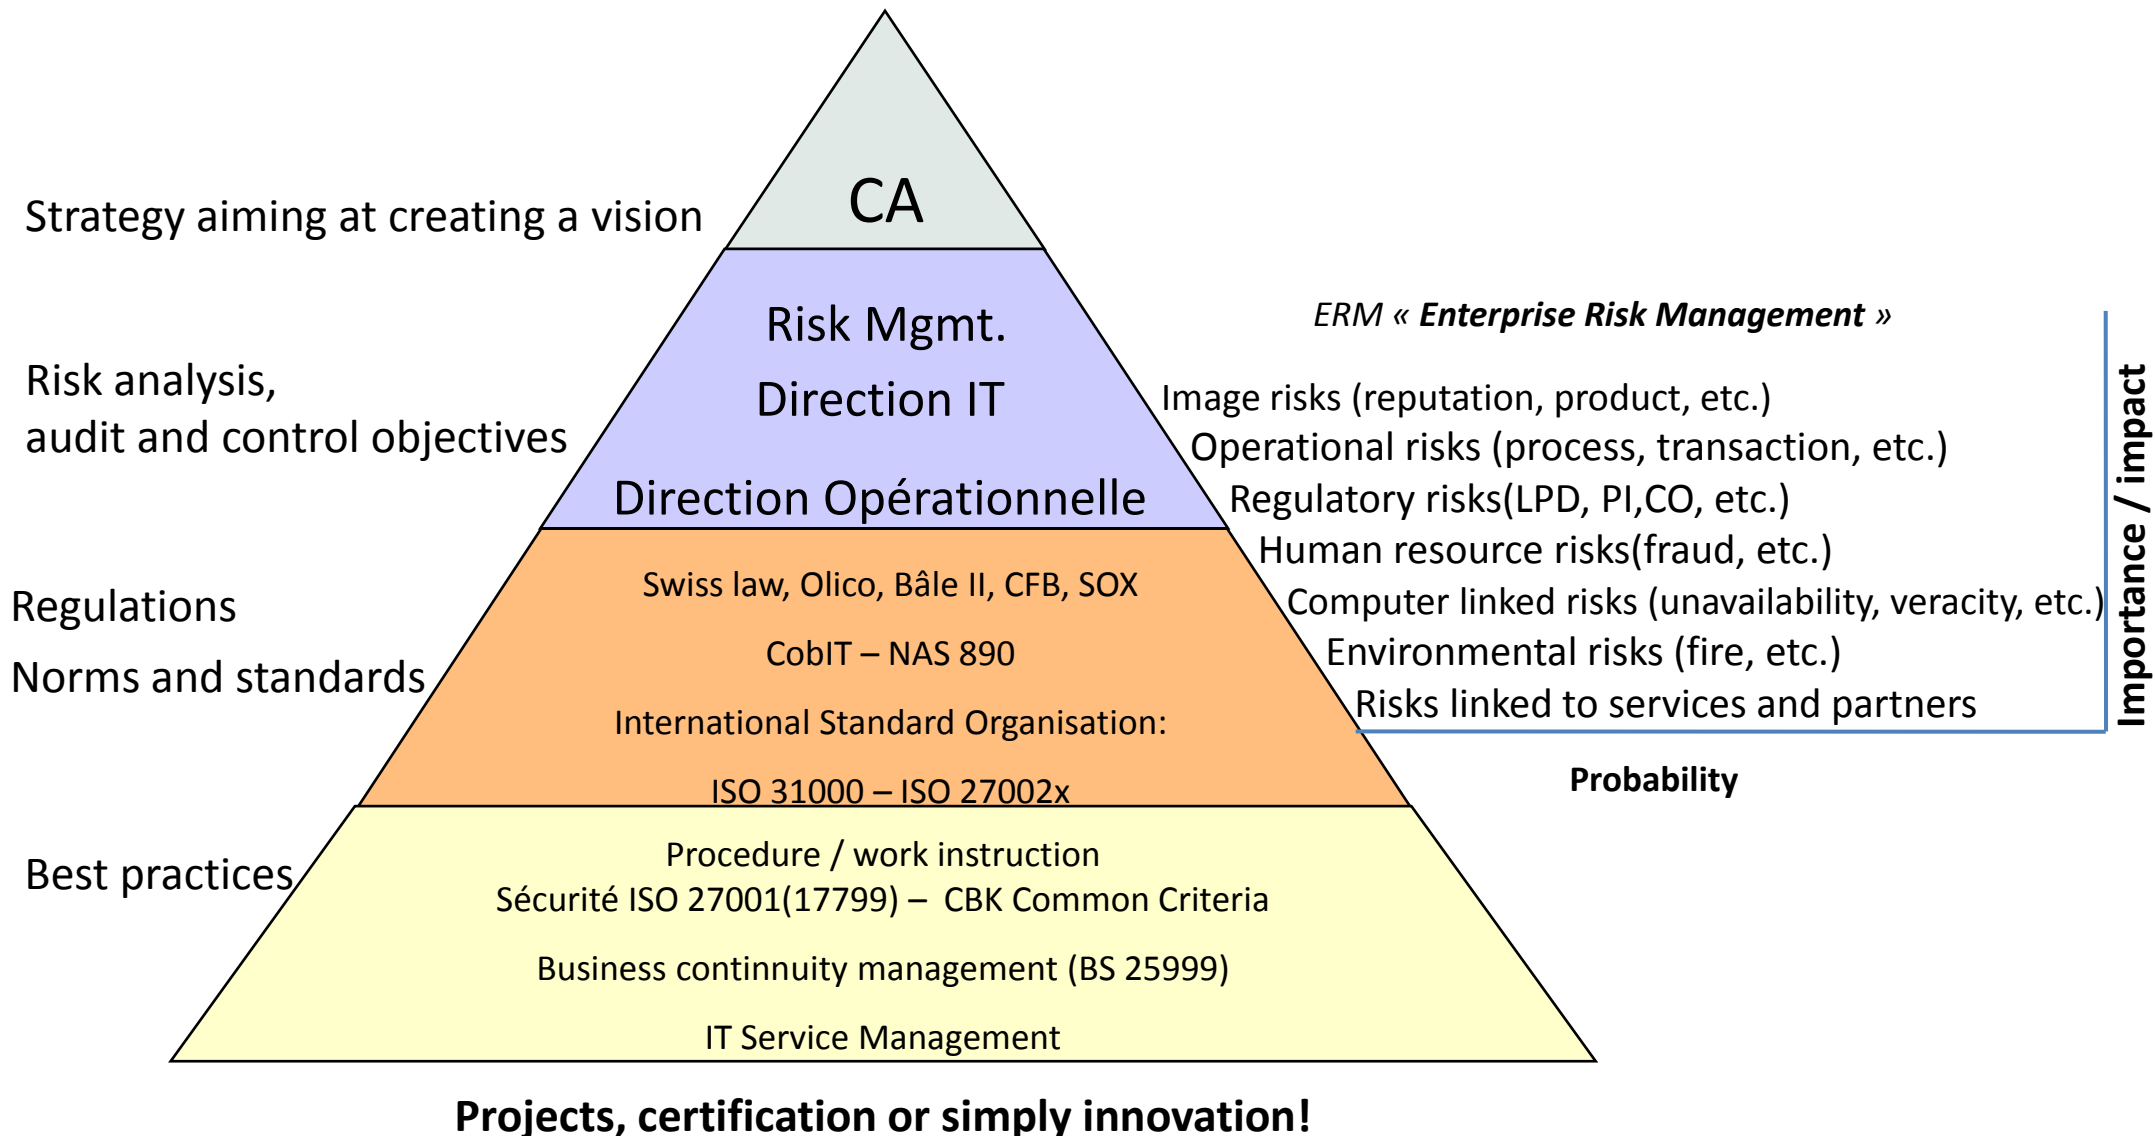

« Trust is good,
control is better! »

Who we are

- Vector Security Consulting S.A is an independent Swiss company specialised in auditing and strategic and operational consulting in information security.
- We assist our clients in accomplishing their mission by assessing the risks inherent in their activity in order to help them implement a risk management strategy during IT projects and organisational initiatives.
- Our experience in the financial and industrial sectors, acquired over the last 15 years, allows us to assist you with risks and security management, in a manner that meets the specific needs of your business.
- VSC, professionals certified by the following recognised organisations:
 - risk management (ISO 31000, M_o_R, CRAMM,)
 - audit (ISACA – CISM - CISA) , CobIT
 - security (ISC²,CISSP), ISO 27001 Lead auditor
 - IT Service Management (ITIL), IT process management.
- These certifications, as well as our rigorous methodology and focus on best practice constitute the guarantee that attests to the quality and reliability of our work, all the while ensuring the expertise that is the hallmark of our reputation.

Our approach:

Mapping risks and implementing controls and corrective measures for the entire company or by business process according to the chosen strategy and regulatory demands.

Our services:

- Over and above the security of equipment and IT infrastructure, the lifecycle of a company's assets largely depends on the protection of information and expertise. Controlling your critical business process will allow you to anticipate issues and ensure the seamless continuity of your activities.
- VSC has developed a full offer of services and support in the area of information system security integrating organisational, technical and behavioural components.
- We set ourselves apart through our tested methodical approach, allowing us to build transversal recommendations. Our services fully integrate the human factor with security challenges and we base our work on standard references and best practices :

ISO 31000 (ORM) - COSO & CobIT - ISO 27001:2005 /ISO 20000 – ITIL Service Management

- The clear benefits of working with us include:
 - ❖ a tailored solution that fully meets your company's needs.
 - ❖ a cost-effective approach, substantially reducing service costs
 - ❖ assisted guidance of the security process thanks to our simple and easy to use tools
